

A decorative graphic on the left side of the slide, consisting of a network of thin, light-blue lines and small circles, resembling a circuit board or a neural network diagram.

EXTENDED PROJECT QUALIFICATION:

ARTIFICIAL INTELLIGENCE, THE ETHICAL CHALLENGES THAT IT
PRESENTS AND HOW GOVERNMENTS HAVE AND SHOULD
APPROACH ITS REGULATION?

BY HENRY MCMAHON

CANDIDATE NUMBER:

CENTRE NUMBER:

WHAT I WILL COVER:

- Aims and objectives
- Why I chose this subject
- My question
- Key areas covered and their sources
- Conclusion
- Did I fulfil my aim?
- What I learnt during my EPQ
- What I will do differently next time
- How does this EPQ impact my future

AIMS AND OBJECTIVES:

- To write a 5,000-word essay on AI, its ethics and its regulation
- To use various sources that show all sides to the story, so my arguments are detailed, fair and balanced
- To develop my project, essay and research skills
- To broaden my knowledge of AI and regulation

WHY I CHOSE THIS SUBJECT:

- It is very relevant to my education
- The variety of arguments and viewpoints
- It is a recurrent theme in the media
- Its ever-increasing rate of development and growth
- Ethical concerns from consumers and developers

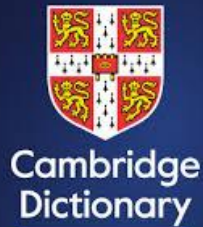

MY QUESTION:

Artificial Intelligence, the ethical challenges that it presents and how Governments have and should approach its regulation?

Question breakdown	Associated questions
Artificial Intelligence	What is AI, and what does it do?
The ethical challenges that it presents	How can artificial intelligence be unethical?
How Governments have and should approach its regulation?	What have governments already done to regulate it, and how should they regulate it in the future?

KEY AREAS COVERED AND THEIR SOURCES:

The different 'types' of AI

Ethical concerns for consumers
and developers

Case studies UK and EU

EU Artificial
Intelligence Act

European
Parliament

GOV.UK

CONCLUSION:

- Long term, regulation will increase consumer trust and adoption of AI
- Regulations are needed to make sure fundamental rights are not overstepped
- By regulating now, we can study the difference it makes and conclude the best next steps
- It must be controlled by guidelines and regulations to ensure that the correct kind of growth is promoted

DID I FULFIL MY AIM?

- Yes, I did achieve my aim of writing a 5000-word essay
- Yes, I did research and use sources for all sides of the argument
- I have developed my essay and research skills
- Yes, I have expanded my knowledge on the inner workings of AI
- I have also expanded my knowledge on the wider effect AI has on society, the economy and governance
- Finally, I have learnt more about the processes of regulation

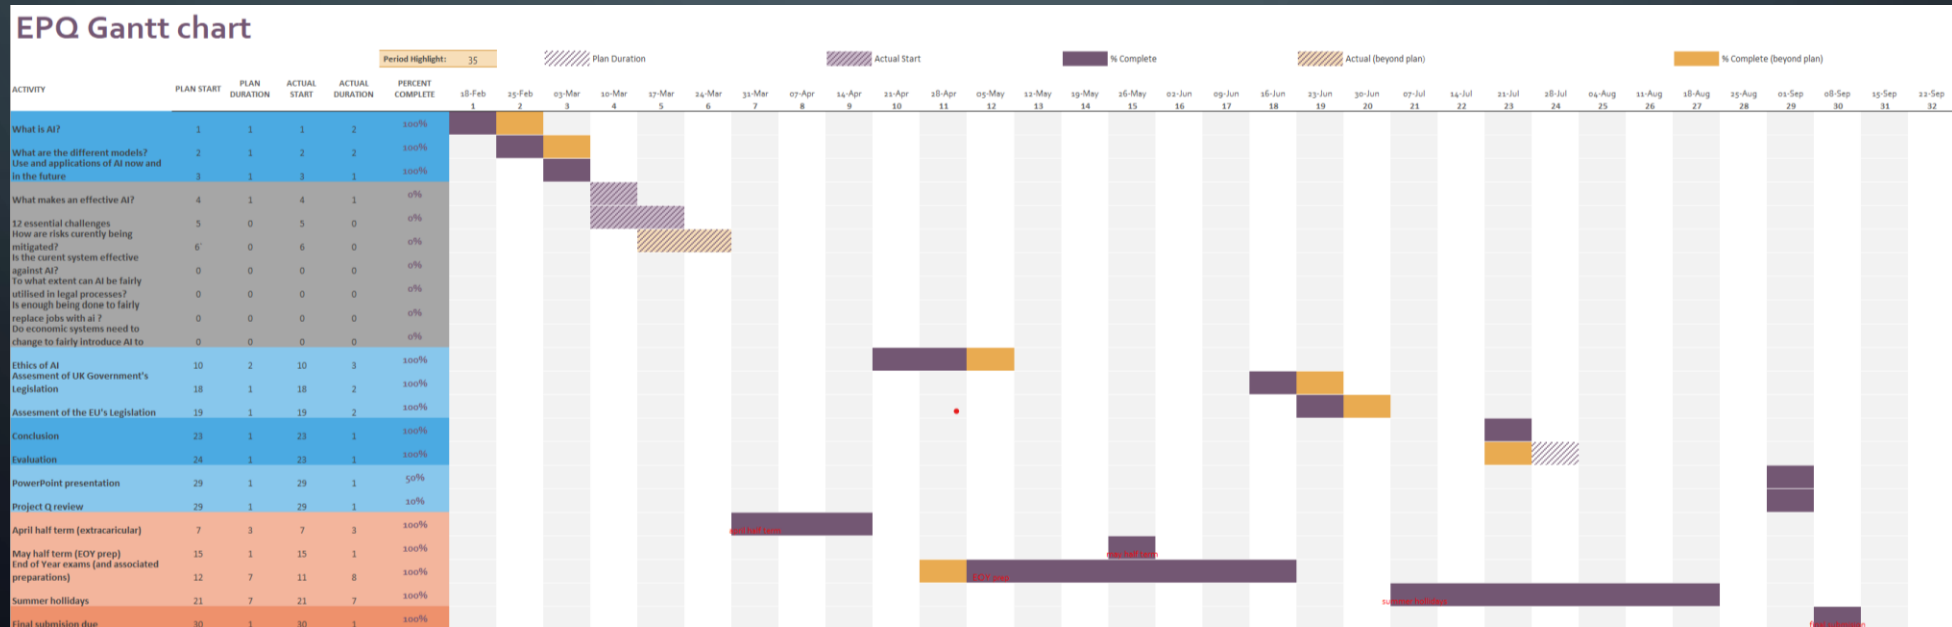

WHAT I HAVE LEARNT DURING MY EPQ:

- Time management: modifying the time frame when required
 - Research skills: evaluation of sources
 - Analysis skills: comparison of sources and research
- 
- 

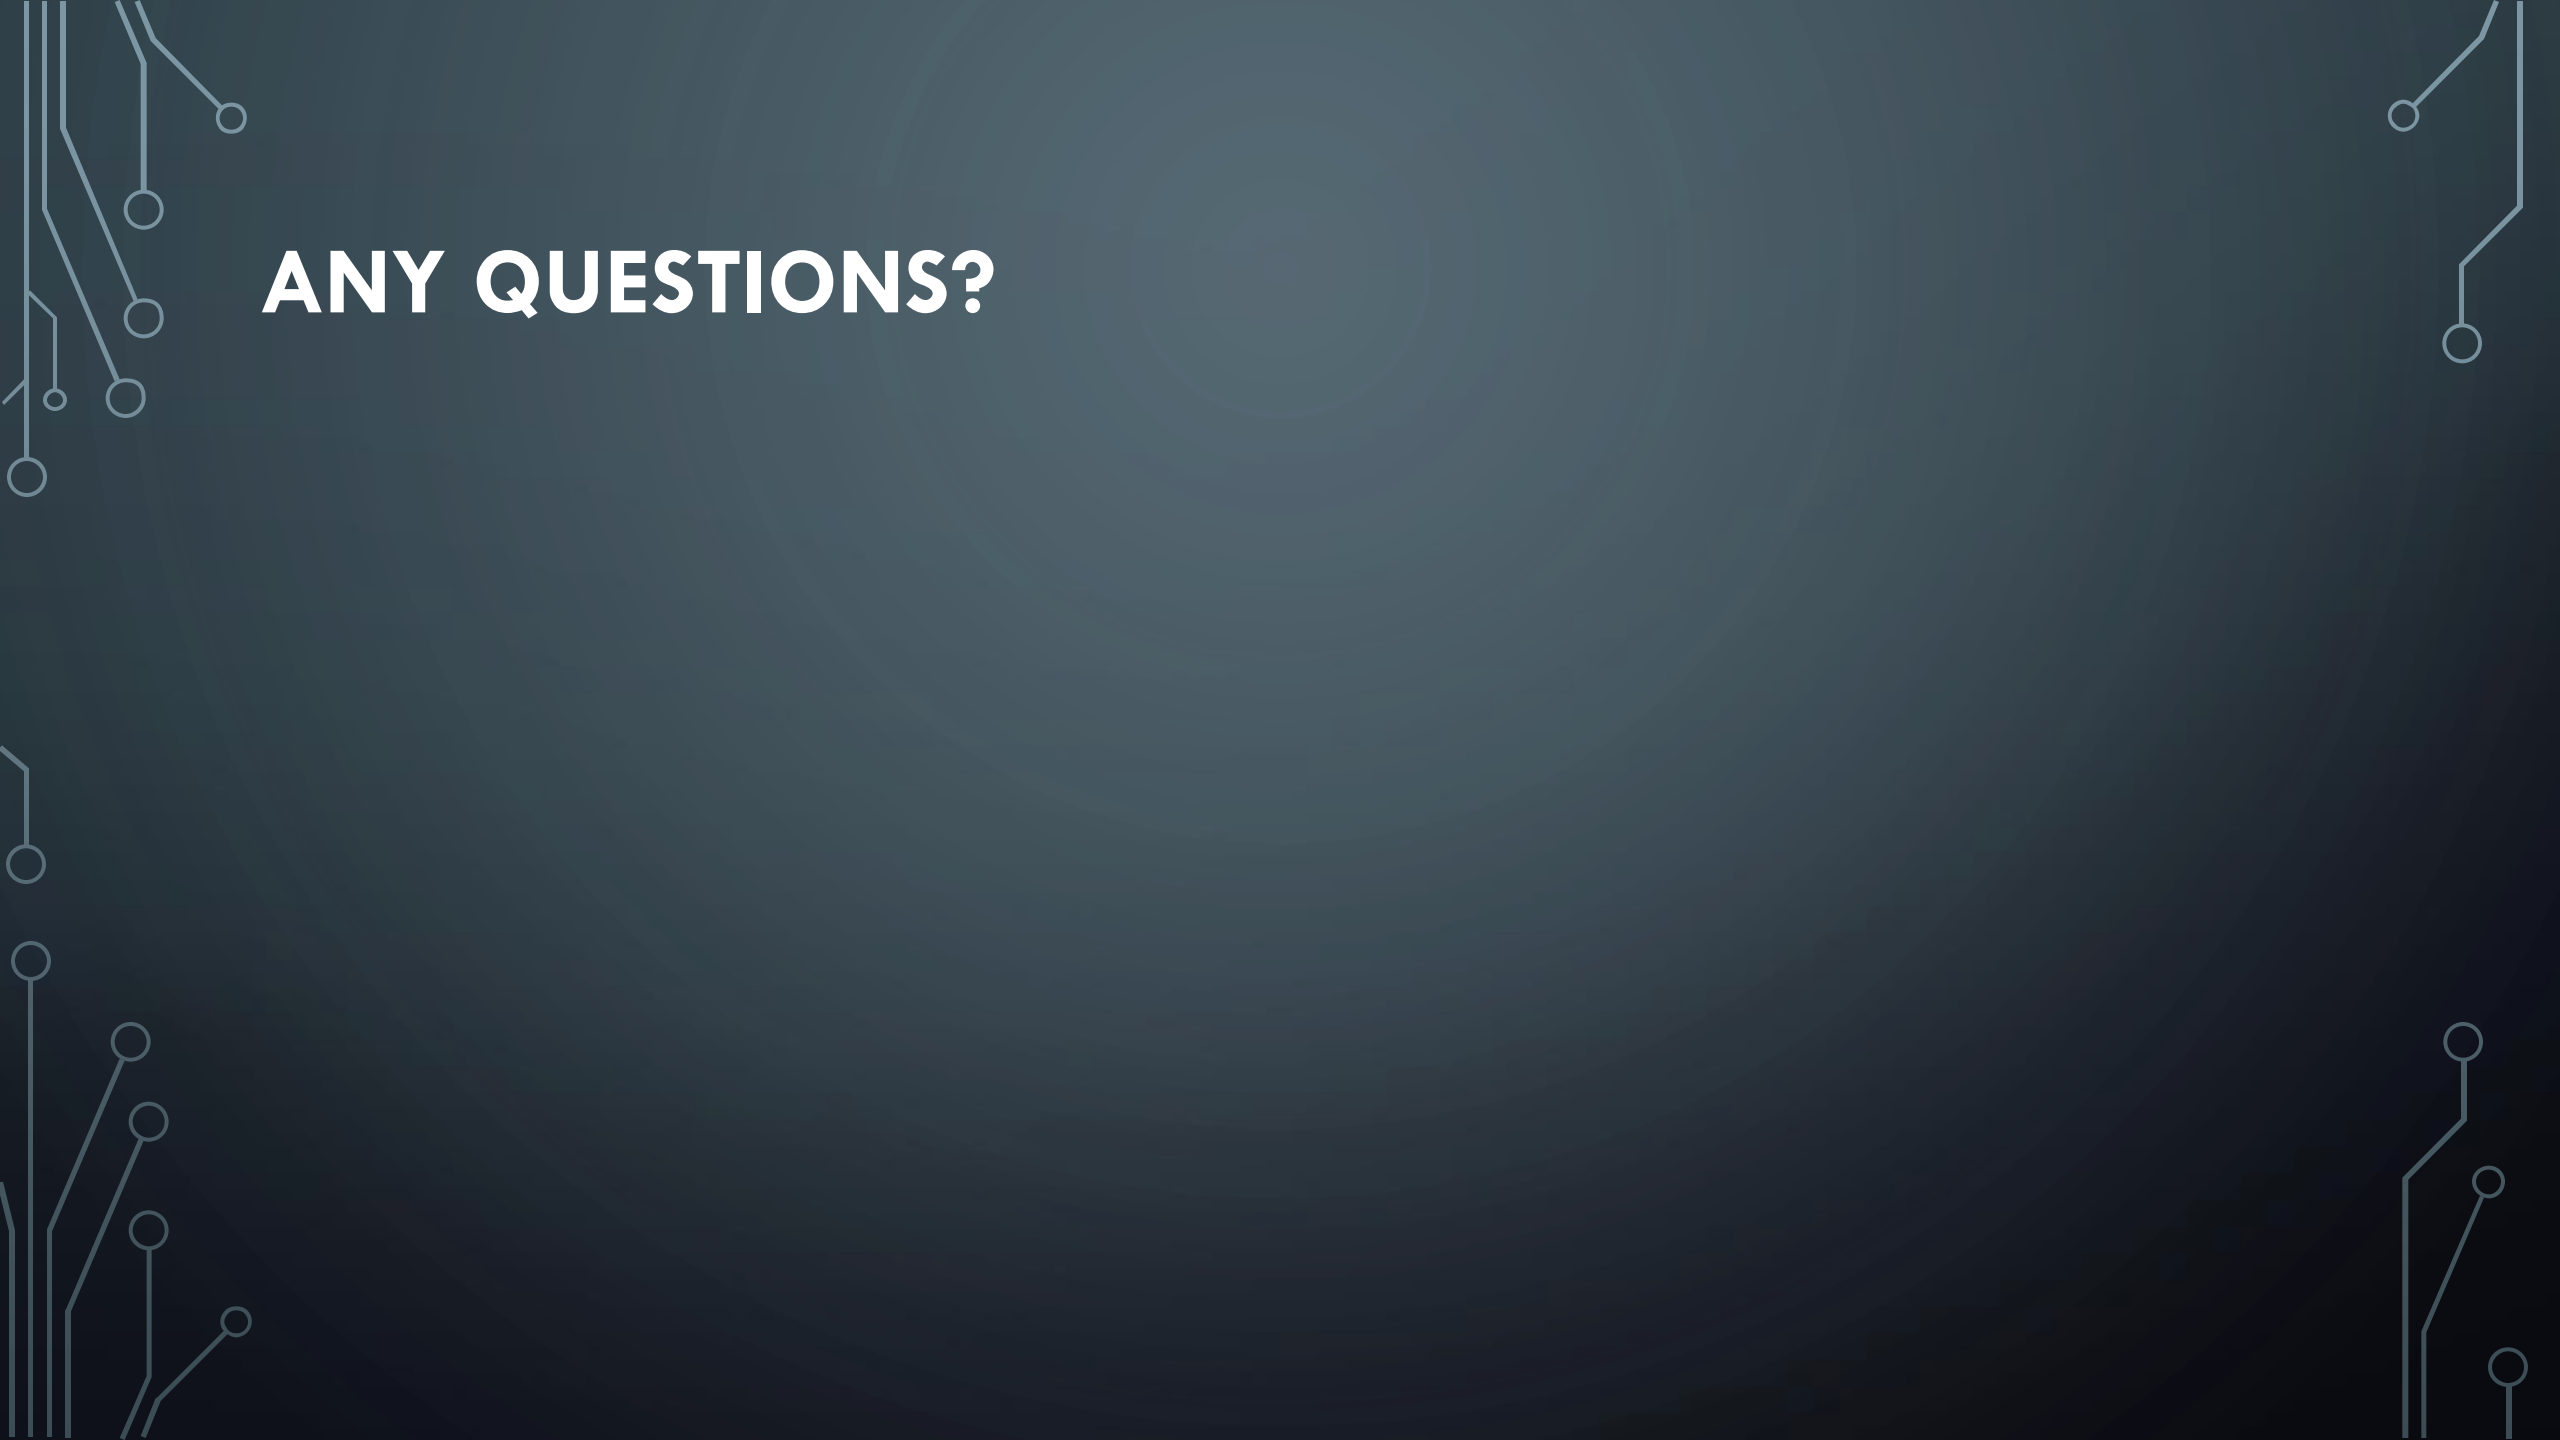

WHAT I WOULD DO DIFFERENTLY NEXT TIME:

- Build a clearer picture of the structure of the project from the start
- Create a more detailed plan and research from the beginning of the project
- Populate my Gantt chart with more achievement milestones

HOW DOES THIS EPQ IMPACT MY FUTURE:

- Knowledge of AI terminology will be key to studying Computer Science at University
- A greater interest in the regulatory journey of AI has inspired me to keep up to date with laws directly relevant to my career journey
- Evidence to show my passion for AI and the effect it has on society

The background is a dark blue gradient with faint, large concentric circles. In the corners, there are white line-art illustrations of circuit boards or neural networks, featuring lines and small circles.

ANY QUESTIONS?
